SUMMARY

Full-Stack Developer with 12+ years of experience building production-grade web systems. Frontend work centers on React and Vue — building reliable UI architecture, handling complex state, and optimizing rendering performance. Backend work covers PHP (Laravel) and Node.js — designing APIs, data flows, and integration layers that scale.

Recent projects include offline-first PWAs, real-time sync systems, and SaaS platforms for logistics and operations. Current focus is on integrating AI into development workflows: using Markdown-based pipelines, Claude Code, and multi-AI APIs to automate reasoning, track progress, and reduce development overhead.

EXPERIENCE

Lead Developer

October 2024 - Present, France

StoragePal

- Led frontend architecture for StoragePal's enterprise WMS PWA using **React.js, Inertia.js, and shadcn/ui**.
- Designed modular, reusable UI systems powering five distinct role-based workflows across warehouse, logistics, and support operations.
- Improved app performance by 99.5% through **caching, code splitting, and frontend state optimizations**.
- Collaborated closely with designers to deliver pixel-perfect, cross-browser UIs with offline capabilities.
- Implemented **real-time dashboards**, push notifications, and advanced search features.
- Applied an **AI-assisted development workflow** using **Claude Code** and Markdown-based pipelines to automate reasoning, code reviews, and progress tracking across projects.

Senior Full Stack Developer

July 2023 - August 2024, Morocco

Atlas Web Solutions

- Engineered and launched **5+ SaaS platforms** including Autoreels.ai using **Laravel, Inertia, and Vue.js**, serving **600+ daily active users**.
- Built custom **FFmpeg video processing library** with dynamic scaling supporting **20+ concurrent jobs** and reducing video generation time to under **1 minute**.
- Architected **multi-API integration workflows** connecting 8 APIs with advanced **Laravel queuing systems** managing 5 independent job types.
- Optimized **AWS infrastructure** and database architecture to support high-volume concurrent video processing with auto-scaling capabilities.

Senior Full Stack Developer

December 2022 - May 2023, Estonia

Singularity Creations OÜ

- Boosted application performance by **60% through** MySQL query optimization and strategic indexing.
- Delivered **10 production-ready features** including robust PDF generation with dynamic content.
- **Modernized legacy codebase** with improved documentation and maintainability standards, reducing technical debt.

Full Stack Developer (Contract)

July 2020 - June 2022, Denmark

Aviadmin | DK Remote

- Refactored legacy PHP 5.4 codebase to PHP 7 for enhanced performance and security.
- Rebuilt frontend using Vue.js with atomic design pattern components.
- Optimized calendar system: Reduced load times from 34 seconds to 0.3 seconds (99% improvement).
- Implemented document expiry/blocking system and Learning Content Management System (LCMS).

Full Stack Developer

January 2018 - June 2020, United Kingdom

Black and Yellow LTD

- Built **custom PHP and JavaScript frameworks** for secure, lightweight enterprise solutions without external dependencies.
- Implemented **CI/CD pipelines and Docker** for streamlined deployment across environments.
- Successfully deployed ticketing system now used by **major UK retailers**.

Founder & Technical Director

June 2012 - January 2018, Algeria

Mawaki3 Development Agency

- **Founded and scaled** development agency from **2 to 7 developers**, delivering **100+ projects** for international clients across US, France, and UK
- Led technical team development in **PHP, WordPress, PrestaShop, and Magento** platforms, establishing coding standards and QA processes.
- **Mentored junior developers** and built scalable project workflows for e-commerce platforms and enterprise applications.

SKILLS

- **Backend Development:** PHP (Laravel 11, Symfony), Node.js, RESTful APIs, PSR Standards, Database Design & Optimization
- **Frontend Development:** React.js, Vue.js, Inertia.js, Next.js, Tailwind CSS, Bootstrap, JavaScript (ES6+), Component Libraries (shadcn/ui)
- **Database & Storage:** MySQL, MongoDB, Query Optimization, Database Architecture, Data Migration
- **DevOps & Infrastructure:** Docker, AWS (EC2, S3), Linux Server Administration, GitLab CI/CD, Apache, Nginx, WSL
- **Development Tools & Practices:** Git, Figma, Performance Tuning, Code Review, Agile Methodologies, Technical Leadership
- **Platform Integration:** WordPress (Custom Development), PrestaShop, Shopify, Third-party API Integration
- **Languages:** English, French, Arabic

EDUCATION

MSc in Computer Science

University of Badji Mokhtar – Annaba, Algeria • Graduated 2012

Focus: Software Engineering, Distributed System
